PROFILE

Communication & Multimedia Design student at Avans University of Applied Sciences, currently following the Artificial Intelligence minor. I build interactive web experiences and game prototypes where design, code and 3D meet, and I completed a frontend internship at LiveWall in 2026. Looking for part-time work alongside my studies, a graduation internship, or a junior creative developer / frontend role.

EXPERIENCE

Frontend Developer (internship) · LiveWall | United Playgrounds, Tilburg · hybrid Feb 2026 – Jul 2026

- Worked on interactive campaign sites and branded digital experiences for clients.
- Built web pages and components with React, Next.js and Vue, styled with Tailwind CSS.
- Brought 3D models and creative concepts into the browser with Three.js / WebGL.

3D modelling & 3D printing (freelance) · Riego Realm, Tilburg Jan 2025 – present

- Small side business: 3D modelling and 3D-printing jobs for clients, from idea to finished print.
- Model and prepare designs in Blender; handle client contact, quotes and delivery myself.

Crew Member (part-time) · McDonald's, Tilburg Sep 2025 – present

- Food preparation in a fast-paced kitchen at peak volume: teamwork, precision and time management under pressure.

Meal delivery (part-time) · Thuisbezorgd.nl, Tilburg 2025 · 6 months

- Delivered meal orders independently: on time, reliable and friendly with customers.

PROJECTS

AR You Ready? Unity · C# · Blender

Speculative game about social isolation in the Netherlands in 2050, made for the Planbureau voor de Leefomgeving (PBL). Design and development; focus on AR UX and narrative systems.

Ocean Cleaner Unity · C# · Blender

Underwater cleaning simulator inspired by power-wash games, teaching ocean conservation through hands-on gameplay.

Smart Parking Vision Python · OpenCV

Computer-vision prototype for the TU Delft Science Center that detects free parking spots; my role was computer vision and prototyping.

EDUCATION

Bachelor Communication & Multimedia Design · Avans University of Applied Sciences 2023 – 2028 (expected)

Minor Artificial Intelligence (30 EC) · Avans University of Applied Sciences, Breda Sep 2026 – Jan 2027 (in progress)

Machine learning from problem to deployment: supervised/unsupervised/reinforcement learning, neural networks, transformers, AI ethics.

SKILLS

Confident	HTML, CSS, Tailwind CSS, Unity prototyping, Blender, 3D printing
Working knowledge	JavaScript / TypeScript, React, Next.js, Three.js / WebGL, C#, Python, OpenCV, Figma
Learning	Machine learning (AI minor)
Also	PC assembly, maintenance and troubleshooting

LANGUAGES

Dutch – good · English – good
